Hi Paul,

I didn't have any more information in my notes than you have on your timeline. Looks good and covers much of what I had documented or remember. I also cannot comment on anything after the 27th since that was the day of my departure. Should you have any specific questions, I might be able to help, otherwise looks like you captured the incident very well.

Thanks.

Subject: Early Response Timeline for Red River Supply Fire

Hey All,

So I find myself already losing track of when some of the early events at Red River happened. So I put together a timeline (attached) and was hoping you guys could take a look at it and make comments.  
Thanks.

paul
